Data Consulting

Hearing your situation and identifying issues

After clarifying the business goals you want to achieve, we identify the true management issues.

Solution provision and implementation

Data incorporating cutting-edge Silicon Valley technology in real time

Our team of scientists will propose and implement the best solution from among all options, free from Japanese preconceptions.

Responds to following types of requests from our customers:

- “We have organized a data team with an awareness of the importance of data utilization, but it is not working well, so we need your help.”
- “I am interested in data-centric management, but I don't know how and what to do first..”
- “We are practicing data utilization, but are wondering if we can do something about the tedious data cleansing process..”

Iconic Data vision

**To create a wave of freedom
that comes from eliminating redundant tasks.**

These are our Iconic Values

Alliance

We value alliance, unity. Being a one team, a fellowship, a company of people doing **together**.

Exceeding

We value **exceeding** expectations and ourselves.

Humanity

We build for humans, with the goal of freeing **humanity** from the mundane.

Excellence of our people

We value the excellence of our people. Our exceptional **professionals** working in a diverse and inclusive environment.

R&D

In-house developed system

We are promoting a SaaS project that aims not only to solve corporate management issues, but also to automate management and increase corporate value. We are conducting offshore development in Myanmar and training a development team for the next generation.

Data consulting for subsidiaries within the group

Providing consulting services to improve corporate culture and lead the company to success.

Examples of consulting services

- AI chatbot development for automation of labor and administrative operations
- Marketing research and market analysis support
- Web skill test production (for data engineers, analysts, and scientists)
- Development of employee performance management and career path support tools, etc.

Overseas Offices

ICONIC DATA has offices **in the U.S., Singapore, Shanghai, Myanmar, and India**, and is constantly incorporating the latest information (cutting-edge technology, market trends, and overseas conditions) from around the world. We are not bound by the existing concepts of Japanese society, but pursue unlimited possibilities, and propose and realize the best solutions for our clients from a wide range of options.

We are piloting tomorrow's creativity through hybrid tech consultancy, and intelligence solutions.
